All-

Thank you so much for your vote!

We will move forward with Tenman intercom system.

Regards,

Bonnie

Dear Board,

Please find see 3 options for replacing our intercom system:

- Option1: Teman –no wiring, using mobile devise and face recognition to unlock front door/view and speak with visitors, delivery people through mobile devise/lowest cost
- Option 2: Comlit IKall – no wiring, using mobile devise to view/speak to visitors, delivery people, unlock front door through mobile devise or phone line
- Option 3: Comlit Ikall – traditional intercom system, requires wiring and intercom station on each floor to buzz in visitors/delivery people/highest cost

You can obtain additional information for Teman: <https://teman.com> and Comlit Ikall:<https://www.comelitgroup.com/en-us/video-entry-technology/outdoors/ikall/> on their website.

I feel option 1 will serve best for our Co Op for the following reasons:

- Both option 1 & 2 were developed using internet (IP address): no wiring required. Both options are cheaper than option 3. Therefore, I would eliminate option 3
- Option 1 &2 have the functionality to use our mobile devises to view/speak to visitors and delivery people. Also the mobile devise can unlock door remotely. Option 1 has face recognition capability, you can enter in the building without using keys, mobile devise or codes.

Please vote by selecting option 1, 2 or 3 to replace our current intercom.
